

Acknowledgement of Reviewers

The quality of any scientific journal depends on the quality of its peer review process. Reviewers donate their time for this altruistic activity and often receive only little recognition. They are, however, selected based on their expertise, and each review received by the Editors is rated according to quality.

We have been impressed by the quality of the reviews undertaken in 2020. Our reviewers have been of inestimable help in assessing the merit of papers submitted to the Journal, and they have often enhanced the overall quality of accepted manuscripts by their critical analyses and suggestions about how a paper might be improved. The overall quality of the EJVES can therefore be attributed to a large extent to the quality of its reviewers.

The Editors would like to pay tribute to the following **417** reviewers who are listed in alphabetical order and who completed a total of **3281** reviews during **2020** (individual totals over the past 12 months in brackets). As a token of our appreciation reviewers are granted a 30 days free access to Scopus and Science Direct after each review, and they can download reviewer certificates for their EJVES reviews by registering with the Elsevier Reviewer Hub: <https://www.elsevier.com/en-gb/reviewers>.

The Editors are very grateful for the outstanding contribution of the EJVES reviewers and look forward to working with them in **2021**.

F. Dick, Editor-in-Chief
