SKI REGION

Bad Kleinkirchheim is a popular ski region, because of its very good snow conditions, which boasts a ski season that is longer than any other places (December-April). The ski pistes are well groomed and artificially snowed (800 snow cannons, 97 percent of the slopes). The altitude of the ski resort is 2055 m (6742 ft) and there is 103 km (64 miles) of ski pistes and 54 km (34 miles) of cross-country tracks available for use at that resort. The Mountain Biosphere Park is located in close proximity to the resort and it hosts many hiking opportunities. The whole “spa tradition” emanates from the local saying, ‘From the pistes into the spas’, and this is what the Pulver Hotel strives to convey to its Hotel Users.

Bad Kleinkirchheim is an elegant area, which ensures conservation of its surrounding natural areas.

We wish you a pleasant Congress and hope that this stay brings you a new positive experience in your professional and personal space.
