

## Global village guidelines

ESVS 32nd Annual Meeting 2018  
25-28 September 2018, Valencia, Spain

### What is an ePoster?

'ePoster' stands for electronic poster. Attendees of an event can view your ePoster on interactive touch screens. The advantage of this system is that you can show a lot more information than on classic paper posters.

Prepare your ePoster as a 16:9 Powerpoint-presentation.

The ePoster software is fully compatible with the PPT-file format. In order to create a correct ePoster, just start creating a presentation in portrait mode.

What are the dimensions of an ePoster?

The preferred aspect ratio of an ePoster is a 16:9 PowerPoint-presentation in portrait. All touchscreens on the event will be installed in portrait mode.

Are there any required fonts?

Since we cannot guarantee that every touch screen has your preferred font available, it is recommended to use system-default fonts, such as Arial & Verdana.

Can I use videos or animations in my ePoster presentation?

Videos could be integrated into your presentation and will be clickable on the screen.

Is there a file size limitation?

The maximum file size is 15mb per PPT file.

Late submissions

E-posters not uploaded prior to the submission deadline can NOT be uploaded at the conference. Uploaded presentations can NOT be replaced during the conference.

Submission deadline

The final deadline to upload your ePoster is **September 24th midnight - CET**.

**Up to 6 slides per national society. Please indicate: "Global village" as abstract number code into the online platform.**

### ePoster submission link

You can submit your ePoster on the following link:
