Ladies and Gentlemen

Ladies and Gentlemen, it is a great honour to invite you to the **second edition of the multilevel venous workshop**, which will be held on the 14th and 15th of October in Bratislava, the capital of the Slovak Republic.

MU-ltilevel VE-nous WO-rkshop

The first edition of the muvewo in November 2021 confirmed that, despite COVID and lockdowns, interest in education in phlebology is not decreasing. Quite the opposite, two years of isolation caused the demand for new information and personal meetings to grow. From your suggestions, there appears to be a huge international interest in didactic conferences with sufficient space for questions and discussions.

Our Ambition

We are ambitious to build a new platform bringing together beginners and advanced phlebologists in an open and free discussion. We want to offer the floor in particular practical everyday phlebosurgery and phlebology. We want to focus on the details that will improve our and your results. We want to bring lectures and interviews with the best about what, how, and why. We want to talk openly about complications and how to avoid them.

What Did We Prepare for muvewo 2022?

We try to answer current questions concerning thermal ablations. We will look in detail at the issue of nonthermal-nontumescent ablations. It will certainly be not only about achievement. A special section is dedicated to thermal and non-thermal ablation complications and recommendations for solving and avoiding them. We have prepared a hands-on workshop focused on diagnosing and treating perforators, a neuro-sonography workshop for mini-invasive varicose vein surgery and more. Our international and national faculty guarantees high-level education and scientific sessions.
